If arriving **by car** from any direction, follow the signs to downtown („Centrum“) and for university („Hochschule“).

International Finance and Economics

Master's degree program

Das OHM creates...
futures.

Who we are

Georg Simon Ohm University of Applied Sciences Nuremberg

Ohm University is a university of applied sciences with a strong practical focus in both academic education and research activities. Twelve departments offer basic and advanced degree programs as well as professional development programs and cooperative education programs.

With more than 10,500 students, 276 professors, 486 lecturers and a large adjunct staff, OHM is the second-largest university of applied sciences in Bavaria and one of the largest nationwide. The most research-intensive of all Bavarian universities of applied sciences and leading in third-party funds, OHM maintains excellent ties with local and international companies.

The university is also active as a global player and has established more than 130 partnerships with other universities worldwide. This facilitates international exchange programs and benefits our approximately 1,100 international students from 96 nations.

Department of Business Administration

The department numbers about 2.100 full-time students, offers a wide variety of specialized studies and is equipped with state-of-the-art computer labs and an excellent library system.

The **International Business Program (IB)** consists of two undergraduate programs (International Business and International Business and Technology) and two postgraduate programs (Master in International Finance and Economics and Master in International Marketing). There

are approximately 300 undergraduate and 100 postgraduate students.

Students will benefit from our extensive company network which includes world renowned companies such as Deutsche Bank, Siemens, Adidas, Puma, Staedtler, Audi and BMW. Our full-time teaching staff has both excellent academic and professional credentials, and our part-time lecturers hold top managerial positions in major international firms.

What the master's degree program International Finance and Economics offers

We offer a strong specialization for graduates and equip them with a comprehensive and up-to-date knowledge of international finance and economics. Emphasis is also placed on soft skills, like business ethics.

Our students actively seek an intercultural atmosphere and are eager to spend some time of their life abroad. High academic ambitions and the capacity for hard work are the driving factors for them to embrace this demanding commitment.

Career outlook

Our graduates, so far, have taken upon positions in:

- Finance departments of global manufacturers and service providers
- International banks and insurance companies
- International financial and development institutions

The program's international focus opens the door to many exciting management positions, both now and in the future.

Program structure

The Master in International Finance and Economics is tailored towards careers in the realm of international financing/banking and development.

Endorsed by a large number of international students who already successfully completed our study program, we are not just paying lip services but truly offer international exposure:

- The language of instruction is English.
- Multinational course participants
- If you have not had any prior international exposure you may enjoy a stay at one of our many partner universities.

Closely linked to an extensive network of various international companies and organizations, our students get the most up-to-date knowledge and training. The cooperating firms, in turn, have access to a pool of highly qualified graduates needed for success.

The program is structured in the following six modules:

Foundations

Strategic Management

International Economics

International Finance and Investment
